DUCIE DXPEDITION CANCELLED! On late Monday, November 19th, the DXpedition team turned back to Pitcairn due to the stormy weather conditions. Between the rough seas and having to shut down the diesel engines to clean the fuel filter every few hours, it was just too risky to attempt a landing. As they were heading back to Pitcairn, the team began making plans to operate in the upcoming CQWW Contest from Pitcairn. According to pilot station Dr. Bill, N6GNX, the team made it back OK to Pitcairn, however, once on the island the PIARA Ducie Island team decided not to operate during the CQWW weekend from Pitcairn. The reason given was that a diesel problem necessitated a dozen stops to clean the fuel filter just on the trip back

to Pitcairn alone, and it was decided that it would be prudent to head back to the Gambier Island earlier (0100z) November 22nd. Before leaving, Kan, JA1BK, donated all the antennas and masts and 2 generators to the Pitcairn Island Amateur Radio Association (PIARA) for a future DXpedition. INTEREST NOTE: While on the island, Mike/K9AJ and Vince/K5VT who are both medical doctors, made themselves available to several patients as the number of doctors on Pitcairn just went from zero to two! For more details/information on this operation, check the Web page: <http://www.qsl.net/wd4ngb/ducie.htm>

QSL INFO AND NEWS.....

- OPDX was informed this week that due to medical problems, well-known QSL Manager John Parrot, **W4FRU**, is not able to continue being a QSL Manager for any of his

YA, AFGHANISTAN. It has been reported that well-known DXer Peter, ON6TT, is back in **Kabul**. He is there setting up U.N communications for the U.N. personnel. Knowing Peter, we are sure he will try to receive permission to operate from this country.

ZK2, NIUE. Mike/KM9D and YL Jan/KF4TUG have been very active this past week as

ZK2MO and **ZK2TO**, respectively. Their activity seems to cover 80-10 meters and the WARC bands. Mike does mainly CW while Jan operates on SSB. Also, expected to be active is Tom, VK2IR, **until November 29th**, but there have been no QSNs reported. His callsign is unknown, but is expected to be active on 40-6 meters.
